PRODUCT NAME:

POWER-FLEX

PRODUCT NUMBER:

3800

PRODUCT CLASS:

Natural latex rubber based cohesive flexible bandage with synthetic fibers and elastic backing.

COMMON NAME:

Cohesive flexible bandage.

INGREDIENTS:

PowerFlex contains the following Ingredients:

- A. Synthetic fibers and elastic yarns.
- B. Rubber based cohesive material containing a "mixture" of natural rubber, modified with tackifying resins and pigments.

COMMON DESCRIPTION:

PowerFlex cohesive bandage is a combination of high strength synthetic fibers, elastic yarns and cohesive rubber compound. The cohesive material contains tackifying resins and color pigments. It does not contain any volatile materials.

HANDLING INFORMATION:

PowerFlex contains synthetic fibers, elastic yarns, natural rubber and hydrocarbon resins. This product could be combustible if exposed to a source of sparks or flames; therefore, care should be exercised in this regard.

WASTE DISPOSAL:

PowerFlex should not be considered hazardous waste for the purpose of state and federal regulations.
